**THURSDAY, FEBRUARY 15 4:30-7:30PM
WEWORK FIDI, 27 FLOOR (85 BROAD ST)**

<http://bit.ly/2rwnyn4>

MicroEra Power is developing the world's most efficient stationary

generator systems (100 – 400 kW power range) to provide businesses with ultra-reliable back-up power and cost-effective on-site power generation. Their system replaces a diesel back-up generator with a hybrid power system operating on inexpensive natural gas or propane, converting an underutilized asset into a value-creating energy management tool with a fast payback.

DIGITALCLAIM

Digital Claim uses technology to improve

the claims management and recovery processes of health & travel insurance companies. Digital Claim turns paper files into fully digitized claims using their OCR & machine learning tools.

lilu™

Lilu, the first pumping bra with automated compression, pumps up to 50% more than with a suction pump alone. It is

compatible with most popular breast pumps on the market. With Lilu's pumping bra, you get all the benefits of a breast massage hands-free and hassle-free so you can relax and catch up on emails, news and more.

Rebus is an Artificial Intelligence-based tool that lets any event organizer create its own

app based on their needs in less than 3 minutes. The user only needs to upload basic content (agenda, speakers info, resources, documents and so on) and Rebus's machine learning algorithm will identify the best set of possibilities for each participant.

Node Capital is a technology development and data sci-

ence company that provides a comprehensive range of digital analytics tools to service the cryptocurrency trading needs of hedge funds, private equity funds, fund of funds, private wealth management funds, investment management funds and banks.

ABRAXAS Technology creates value for advertising stakeholders by

providing real-time visibility, engagement and customer behavior metrics. They collect and aggregate each digital signature passing within the vicinity of the sign, allowing advertisers to see how many people viewed the advertisement and when.

Babierge®

Babierge is a baby gear rental service and marketplace serving trav-

eling families. The Babierge platform enables gig-economy moms, called Trusted Partners, to launch baby gear rental businesses providing traveling families and grandparents with the baby equipment they need to better enjoy a family vacation, including cribs, high chairs, toys and car seats. Babierge also provides these entrepreneurs with valued product liability insurance and ongoing training in sales, marketing and baby gear safety and cleanliness.

BC3T's proprietary chitosan-based aerosol product allows for easy application to wounds as

well as increased clotting ability for the medical, military, and general consumer sectors, rivaling competing products in both performance and cost.

Leopoly aims to make it easy, quick and affordable for brands, designers, developers, students and consumers to utilize 3D and VR. Their proprietary CAD and modeling-based software solution empowers individuals and companies to easily and quickly create 3D and VR content.

BlastPoint

BlastPoint makes big data affordable and

accessible through the magic of maps, putting big company-style geographic insights within reach of those who need them. Consumers can select from pre-loaded data wrapped in plain language and get an answer immediately in a visual way that is easy to understand with no need to struggle with raw data.

Junkless challenges the status quo of the processed foods industry. They believe great-tasting, convenient breakfast and snack foods can be made simpler without all the complicated

inventions of modern food science. Their foods are made with simple recipes using simple and real ingredients that you can commonly find in your kitchen pantry, and they taste great!

Stemless offers a suite of management solutions that links with existing POS systems for medical and recreational cannabis dispensaries. Stemless is the only cannabis

ordering platform to offer electronic payment processing in full compliance with applicable banking regulations.

Informu is the world's smallest predictive loss prevention device. The Mu

Tag alerts you with in seconds when your valuables are forgotten, stolen or misplaced. Ultimately, Informu is a platform that enables everyone to access any and all information about the physical objects around them.

MORBAX

Morbax HR automatically sources, pre-selects and evaluates

candidates before interviews and shortlists the best-matching talents to HR. The Morbax comprehensive algorithm analyzes each aspect of a candidate's work history, education experience, hard and soft skills and compares them to the company's open position. By making the recruiting process faster and more intelligent, Morbax frees up HR to focus their time, energy and capital on their current workforce.
